NTIRETY CLOUD MIGRATION

ACCELERATE YOUR JOURNEY TO CLOUD

While it's true that cloud adoption has become a staple for every business, executing the physical move of workloads to cloud still presents a lot of challenges—these being the most recognized:[1]

- Understanding app dependencies
- Optimizing costs post-migration
- Assessing technical feasibility
- Assessing on-premises vs. cloud costs
- Rightsizing/selecting the best instance
- Migrating the application and data

Ntirety Cloud Migration

Your applications and data are the lifeline of your business. Ntirety Cloud Migration manages the secure transition to cloud with minimized disruption to operations. Ntirety has extensive experience providing these migration services designed to help your organization achieve cloud success as quickly as possible.

Ntirety helps organizations build hybrid and cloud infrastructures for proactive solutions to your top infrastructure challenges, enabling resilient environments with the automation, self-service, and security required to deploy business-critical applications in response to growing business demands.

MIGRATION SERVICES ARE AVAILABLE TO MOVE WORKLOADS FROM YOUR DATA CENTER OR OTHER CLOUD TO NTIRETY

NTIRETY PRIVATE CLOUD

Dedicated cloud instances hosted in Ntirety owned and managed data centers

vmware **NUTANIX**

NTIRETY MANAGED PUBLIC CLOUD

Secure public cloud environments co-managed or fully managed by Ntirety

aws **Azure**

Key migration milestones

#1
Ntirety's Cloud Readiness Assessment guides architecture decisions and identifies needed app modernization to support workload placement, performance, availability, security, and compliance requirements in the cloud.

#2
Cloud experts work from the detailed assessment findings to design and build a well-architected cloud landing zone that satisfies current needs and accounts for future requirements such as new regulations as well as growth and innovation.

#3
On a timeline that works for your business, Ntirety will orchestrate and execute your workload migration to achieve the least disruptive, fastest path to cloud that maintains security and compliance from end to end.

#4
Once in the cloud, Ntirety can provide guidance on the redeployment or decommissioning of legacy infrastructure and support ongoing management of your new cloud to keep it secure, optimized, and performing.

Cloud adoption framework

Ntirety provides both logical and physical design recommendations for encompassing components to architect a migration based on destination cloud best practices and specific business requirements. Cloud infrastructure–related components, including requirements and specifications for virtual machines, security, networking, storage, and management, are included. engineers work with your team to assess what you have, plan the migration, and execute based on your business and technology priorities.
